

To Dale Milligan
owner of R.A.D. Home Improvement

May 1/09

About 3 years ago I decided to move into my Dad's house. It had been vacant for quite some time and was in bad need of repair. The roof had caved in, there was little or no insulation and lots of mold. So did I renovate or tear it down? So I called Rad Home Improvement. Dale assessed the house and felt that it could be renovated. Dale got all the permits, talked to building inspectors, and because I lived on the water, the Conservation authority.

The house was gutted completely and Dale arranged for all new wiring, plumbing, floors, windows, roofing and siding. Dale was very helpful in offering different ideas for the layout of the house. I now own a beautiful home, with open concept, and a big deck that I enjoy every night.

Dale & his crew completed the job start to finish & I would recommend Rad Home Improvement for hire. They were organized, very clean, and professional. A great bunch of guys."
